About The Hohenbuchau Collection

Primarily comprised of Dutch and Flemish seventeenth-century paintings, it exhibits all the naturalism, visual probity and technical brilliance for which those schools are famous. While many modern collections of Old Masters specialize in a single style or subject matter, the Hohenbuchau Collection is admirable for offering examples of virtually all the genres produced by Lowland artists; the collection is distinguished for the many quality individual paintings executed by more than one artist, working in collaboration.

This exhibition has been supported, in part, by a grant from the Netherland-America Foundation.
